WORK EXPERIENCE

Full Stack Developer Matfly Solutions

06/2025 - Present

Pune, India

- Building and maintaining **full-stack web applications** across frontend and backend.
- Integrating **APIs and databases** to ensure smooth data flow.
- Fixing bugs and resolving **production application issues** with cross-functional teams.
- Deploying and managing applications on **AWS (EC2, S3, IAM, VPC, RDS, Route 53)**.
- Monitoring systems using **CloudWatch logs, metrics, and alarms**.
- Performing **Linux administration and automation** to support stable deployments.

Full Stack Developer Acute Solution

02/2024 - 04/2025

Pune, India

- Developed and enhanced **ERP modules** using **PHP, JavaScript, HTML, and CSS**, enabling scalable and stable business workflows.
- Improved **inventory management processes**, increasing operational accuracy by **30%**.
- Optimized backend logic and database interactions, improving system performance by **25%**.
- Monitored cloud-hosted applications using **AWS CloudWatch (metrics & logs)** to track health and resource usage.
- Implemented **basic SEO and backend optimizations**, resulting in a **20% increase in organic traffic**.
- Assisted operations teams in **identifying performance bottlenecks and resolving production issues**.

EDUCATION

Master of Computer Application (MCA) Sinhgad Institute of Management, Pune

11/2022 - 06/2024

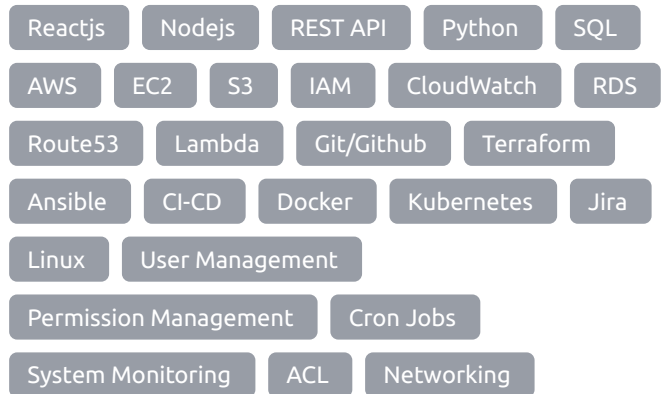

CGPA : 8.06/10

Bachelor of Computer Science (BSc CS) Hislop College, Nagpur

08/2019 - 05/2022

CGPA : 7.37/10

SKILLS

CERTIFICATIONS

Google Cloud Computing Foundation – NPTEL
(10/2023)

Python, Java, C++ – ETH Research Lab (05/2021)

PERSONAL PROJECTS

AWS Monitoring Dashboard for Auto-Scaling Web Application

- EC2 | Auto Scaling | ALB | CloudWatch | RDS | SNS | VPC
- Deployed a scalable web application using EC2, ALB, and Auto Scaling Groups on AWS.
- Configured CloudWatch metrics, alarms, and dashboards for real-time monitoring of performance and health.
- Implemented auto-scaling policies and SNS alerts to enable self-healing and proactive notifications.

Finanza – Financial Advisory Appointment Booking System

- MERN Stack
- Developed an appointment booking platform for advisors and clients using the MERN stack.
- Optimized backend APIs and workflows, improving scheduling efficiency by 25%.
- Built a responsive frontend and supported backend deployment and application stability.

VOLUNTEER ACTIVITY

PO CADET (NCC NAVY) (06/2019 - 07/2022)

Participated in leadership camps and represented the state in National Camp (Ek Bharat Shreshth Bharat), demonstrating strong discipline and teamwork.
